PIONIER.Id Federation partner declaration

..... located at

represented by:

.....

further called a Joining Candidate, declares its wish to join the PIONIER.Id Federation, further called the Federation, as a Member and accepts the following conditions.

§1

Federated Identity Management is a process in which a provider of an information service (further called the **Service Provider**) trusts another entity (called the **Identity Provider**) with end user identity verification and authorization. The Identity Provider trusts the Service Provider’s operational procedures with respect to the handling of personal data required by the service and supplied by the Identity Provider in the process of user authentication and authorization.

The trust between the Service Provider and the Identity Provider is based on bilateral agreements or other procedures replacing such agreements.

The authentication process is protected by the technical parameters contained in the Service Provider and Identity Provider metadata

The reason for creation of an Identity Federation is to simplify and unify the procedures of setting up of bilateral agreements and provisioning of a safe metadata source.

§2

PIONIER.Id Federation is regulated by **the Polish Identity Federation PIONIER.Id SAML WebSSO Policy**, further called the **Policy**.

§3

The role of the Federation Operator in Poland is performed by the Institute of Bioorganic Chemistry of the Polish Academy of Sciences – Poznan Supercomputing and Networking Center (PSNC).

§4

Declaring the wish of joining the Federation implies the acceptance in full and commitment to comply with the rules set by the Policy

§5

Membership rights of a Federation Member may be suspended or revoked in the case of Policy violation by the Member

§6

Each Partner of the PIONIER.Id Federation may leave the Federation at any time by presenting a written resignation to the Federation Operator. Leaving the Federation results in automatic and immediate deprivation of the partner status and deletion of the entity metadata from the Federation metadata set.

§6

Federation Partnership is free of charge
